**CERTIFICATIONS**

- Certified by the Canadian Standards Association (CSA Z259.2-3, descent device category)
- Compliant with NFPA’s standard 1983 (Life Safety Rope and Equipment for Emergency Services)
- Compliant with UL’s standard 1523 (Controlled Descent Devices for Marine Use)

**DEVICES**

- Housing in aluminium alloy
- Main shaft in stainless steel
- Fasteners in stainless steel
- Connecting hook in forged steel
- Anodized finish paint
- Lifeline guide in stainless steel and UHMW
- Dimension: 9” diameter x  4” thick
- Total weight: 18 lbs
- Working load range: 75 to 325 lbs
LIFELINES
- Available diameters: 3/8" and 1/2"
- Material: 100% nylon 6.6
- Length: 600 ft.
- Weight of the 3/8" lifeline: 28 lbs
- Weight of the 1/2" lifeline: 48 lbs
- Min. break strength for the 3/8" lifeline: 6500 lbs
- Min. break strength for the 1/2" lifeline: 9000 lbs
- Melting point: 482° F
- Elongation for the 3/8" lifeline: 2.5% at 600 lbs
- Elongation for the 1/2" lifeline: 1.3% at 600 lbs

SPEED
- For 75 lbs load: 3.2 ft./sec. (1 m./sec.)
- For 325 lbs load: 6.3 ft./sec. (1.9 m./sec.)

ACCESSORIES
- Tool bag
- Storage box
- Personal descent bag for babies and pets

APPLICATIONS

REAL ESTATE AND HOTELS
In case of fire or emergency, the Rescaper ensures a fast and totally safe evacuation of any type of building when usual exits are impossible or difficult to access.

FIRE DEPARTMENTS AND SAR
During evacuation and rescue interventions, the Rescaper allows for a safer, faster and easier evacuation of persons. Firemen and rescuers can also use it to get their equipments down more safely and quickly.

INDUSTRY AND CONSTRUCTION SITES
The Rescaper greatly improves safety and efficiency of high-rise work on construction sites and any type of high-rise structures. It allows for a safer and faster evacuation of workers in case or emergency and can be used to get their equipments down and prevent work injuries and accidents.
