AirBoss-Defense
New CBRN Fire Boot

AirBoss-Defense NEW Ultimate Fit.
Leather boot comfort in a CBRN rubber boot!

New Tooling.....This product is made from totally new AirBoss Defense tooling. The foot form ("last") used to build these boots has been optimized for comfort and fit. Several years of studies made this possible.

Innersole System.....Next to your foot, a medium density footbed further cushions impact and creates a rebound effect to return walking energy. Contoured for comfort and support, this removable footbed is lined with Breathprene™.

Lightweight.....Up to 20% lighter than standard rubber fire boots, the boot "The Boss" Ultimate Fit provides superior protection in a compact design.

This Fire Fighter Boot is certified to the NFPA 1971, 2007 Edition. It has been also tested for CBRN resistance. It offers 24 hours of protection against Sulphur Mustard (HD) and Soman (GD). Toxic Industrial Chemicals resistance results are available on request.

CBRN Test Methods...TOP 8-2-501 (DRDC Suffield)
Def Stan 93-55 (DSTL Porton Down)
Whole Boot Test (DSTL Porton Down)

TICs Test Method.....ASTM F 739-99a

Warning

Your work environment, tools and machinery may present special hazards that are difficult or impossible to protect against. In these cases, good judgement and safe working practices are essential to prevent injury. When working with dangerous tools or machinery, independent testing on all safety equipment, footwear and clothing is recommended.
