

Portable Water Tanks

FIRETAK
MANUFACTURING

New Frontiers in Firefighting

At Last!

A revolutionary new concept for water storage at fire scenes where an auxiliary water supply is required. Responding to the numerous fire service complaints regarding awkward metal frames and bulky foam collar styles that other manufacturers have been providing, **FIRETAK** Manufacturing recognized change was long overdue.

By utilizing a unique concept of an air filled collar, we are able to provide a compact, lightweight, yet durable tank, that can be quickly and easily deployed by one firefighter. Storage space is greatly reduced as our units are stored in a standard compartment, regardless of the tank capacity. Municipal and forestry authorities in many countries are rapidly converting to this economical new product as replacements for their old style equipment. Both the "MHD" Series (municipal) and the "F" Series (forestry) tanks are also available with totally redesigned foam collars for special applications.

FIRETAK MANUFACTURING

using a variety of materials, designs and constructs many different fire related products such as:

- Vinyl backpacks for water & foam application.
- D-CON tanks.
- Totally enclosed tanks.
- Pickup truck tanks.
- Portable water tanks.
- Helicopter slingable water tanks.
- Berms for secondary spill containment.

OPTIONS:

- PVC Carrying/Storage Bag
- Hard Suction Hose Support
- Customized Identification
- 4" (100 mm) NPT Outlet c/w plug (in place of 3" outlet)
- Additional 4" (100 mm) NPT Outlet c/w plug

"AIR COLLAR STYLE"

FIRETAK MHD PORTABLE WATER TANKS

| MODEL | DESCRIPTION | APPROX. WEIGHT | APPROX. COLLAPSED SIZE |
|---------|---|----------------|------------------------|
| MHD1200 | 1200 Imp. gallon / 5400 litres 11' dia. x 36" high | 60 lbs. | 18" x 28" |
| MHD1700 | 1700 Imp. gallon / 7700 litres 13' dia. x 36" high | 65 lbs. | 18" x 28" |

| MHD3300 | 3300 Imp. gallon / 15,000 litres 17' dia. x 36" high | 130 lbs. | 22" x 30" |
| MHD4200 | 4200 Imp. gallon / 19,000 litres 19' dia. x 36" high | 140 lbs. | 24" x 34" |

INCLUDES: 3" (76 mm) NPT Outlet c/w Plug & Repair Kit.

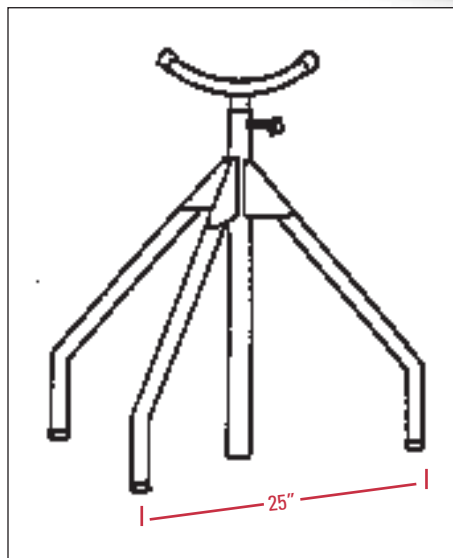

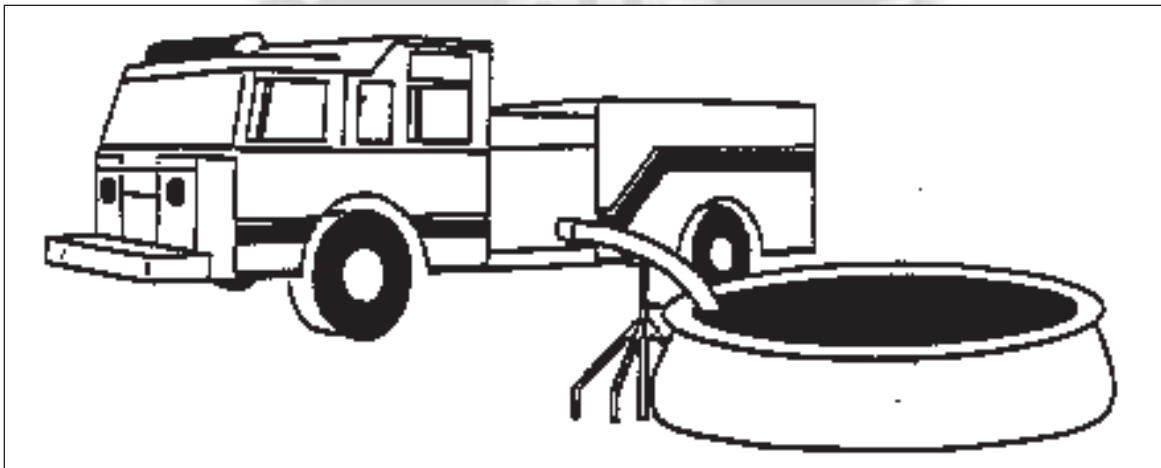

Hard Suction Hose Support

As the fire service converts to the new, compact, compartment-sized, self-supporting relay/drop tanks, it is sometimes necessary to support the hard suction hose while drafting. Our lightweight fully adjustable stand provides a quick hose support and, when not in use, fits easily into our relay tank storage/carrying bag.

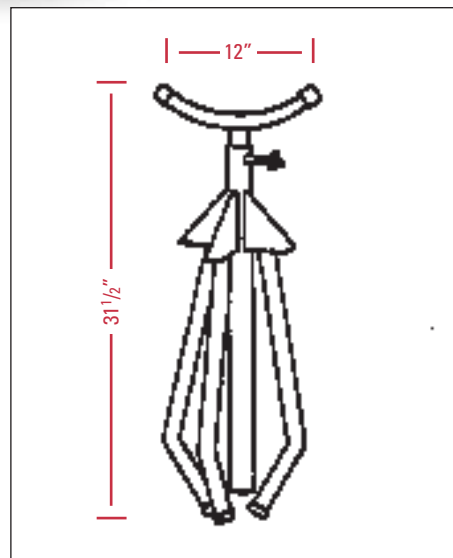

SPECIFICATIONS – MODEL #FT2440

- WEIGHT: 13 lbs.
- MATERIAL: 16 Gauge Steel
- MAXIMUM HEIGHT: 40"
- MINIMUM HEIGHT: 24"
- BASE SIZE (deployed) 25" x 25" x 25"
- COLLAPSED SIZE: 12" x 31½"
- PACKAGING – One per carton
- COLOR: Black
